■ MARC21 Authority Record Chinese Manual

Published in June 2015
ISBN:978-957678-598-6

Authoritative information material is a very important part in cataloging work and is related to retrieval control of bibliographic records. This manual uses the MARC 21 authority record structure to gradually explain in a coherent way. Appropriate examples are selected from Western and Chinese texts. Hopefully, with the distribution of this manual, it will serve as a reference for the domestic library community. Through examples, learn the usage of column format and apply it in cataloguing work and authority work practices.

LIS Seminars

■ NCL Library Management Training Program Courses and Workshops

Organizer: NCL
