>> From the Director-General

The year 2024, largely marked by the impacts of AI and related technologies, saw libraries around the world undergoing incessant evolution as well as growing increasingly diversified. The National Central Library (NCL), while building on past achievements and following the direction of our strategic plan for 2021–2030, has striven to implement various business services, actively moving towards technological integration, service innovation, community support networks, and sustainable development. In this way, the NCL has demonstrated our responsibility and enthusiasm regarding the maintaining of the nation’s knowledge collection and cultural dissemination, while continuing to realize the six core values of knowledge, culture, learning, experience, innovation, and cooperation. The present 2024 annual report is divided into six parts, supplemented by “Annual Statistics” and “Chronicle of Events,” that describe the achievements and efforts of NCL staff over the past year in pursuit of each of the NCL’s six policy directions, ultimately creating a record of our development.

Regarding the body of national literature and value-added collections, the NCL has remained active in the digital preservation of Taiwan’s national literature as well as historical and cultural memory, literature of which includes the acquisition—whether purchases or donations—of personal collections, manuscripts of notable cultural persons, and ancient texts, as well as other resources acquired from cooperation agreements with institutions, civil society organizations, other libraries, and century-old high schools. With regards to reading promotion, the “Four Seasons Reading” series of events covered a wide range of topics and included micro-lectures, reading-adjacent activities, and hands-on experiences, attracting substantial public participation; themed book exhibitions, special exhibitions centered on rare texts and other cultural relics, as well as other more experiential activities were also organized; and events—seemingly innumerable—were held to celebrate World Book Day and the “Taiwan Reading Festival.” In addition, the NCL once again published the annual *Report on the Reading Culture in Taiwan* in an effort to analyze public reading habits and to recognize those cities and counties that exhibit a noteworthy reading culture. Finally, continued work on the “National Public Library Big Data Service Platform” aims to integrate data from libraries of any form for government bodies, libraries, and publishers to reference.

In terms of academic research support, the NCL has continued to optimize academic resource platforms such as the “National Digital Library of Theses and Dissertations in Taiwan,” the “Taiwan Citation Index: Humanities and Social Sciences,” and the “Taiwan Periodical Literature (Search for Articles),” with the theses and dissertations system containing more than 1.08 million full-text entries, making it the

world's largest free database of said Chinese-language texts. Other efforts include the established "Taiwan Consortium of Electronic Theses and Dissertations," which promotes information sharing and international dissemination; the development of the "WriteAid Similarity Scanner" detection system, supported by the Ministry of Education, for theses and dissertations; digitalizing academic journals published in Taiwan to increase their visibility; and collaborating with the National Taiwan University Library to establish "Linked Open Data Taiwan (LDT) @ Library" to enhance information organization services.

For international exchanges and the advancement of Chinese studies, the NCL continued to participate in related academic activities, notably including the annual conferences of both the Association for Asian Studies (AAS) and the European Association for Chinese Studies (EACS), as well as co-organizing several conferences, workshops, and symposiums with institutes here in Taiwan and abroad on various topics. Alerting interested subscribers to such activities, we have published the *Newsletter for Research in Chinese Studies* and expanded its social media community. For other publications, Chinese Studies continues to be a prominent academic journal within the field. The NCL also offers the "Research Grant for Foreign Scholars in Chinese Studies" and the "Taiwan Fellowship" to support foreign scholars conducting research in Taiwan. Moving abroad, we have expanded the global footprint of both the "Taiwan Resource Center for Chinese Studies" (TRCCS) and the "Taiwan Academic Digital Resource Center" (TADRC) by adding new centers in 2024. To further promote exchanges, the NCL actively participates in the Pacific Neighborhood Consortium (PNC), among other international organizations, and the "Taiwan Corner" continues to play a role in boosting other countries' understanding of Taiwan. Finally, these exchanges have reached to our collaborative digitization efforts, exemplified by our cooperation with the Bibliothèque nationale de France in the digitization of rare books and ancient texts.

Concerning smart innovation and service optimization, the main branch of the NCL on Zhongshan South Road realized our project to renovate several key spaces, bettering reading environments and accessibility. The previous establishment of the Open Lab Multimedia Center continues to serve as a space for research, creation, and exchange. Finally, the development of the NCL "Publication Repository System" has streamlined the process of submitting publications to the NCL, and in a similar vein, the newly optimized "ISBNnet" platform better integrates ISBN application and issuance services.

The NCL is also committed to being a leader in library development, and with the support of the Ministry of Education (MOE), has taken an advisory role to provide professional advice on library

operations. To this end, we have published the *Accessibility Guidelines for Public Libraries* to improve service quality; organized numerous training courses for librarians and related staff within the field of library and information science, such as inviting the chief librarian of the University of Toronto for a lecture and other exchange activities; and finally, held the “International Seminar for East Asian Library Professional Librarians” to further promote international regional exchange on related topics.

Looking towards the future, the NCL will continue to uphold its service philosophy of “people first with knowledge as a bridge,” striving to improve all aspects of our operations. With the ongoing construction of the Southern Branch of the NCL and National Repository Library, we aim to create a new hub of knowledge in South Taiwan and thus inject new momentum into cultural developments on the national level. Furthermore, the NCL will carry on our core missions of preserving literature, promoting reading, integrating technology, innovating services, expanding globally, and furthering professional librarianship, thereby becoming a trusted knowledge partner and working alongside the library community in Taiwan to embrace a smart future.

By analyzing the data of these databases through 2023, the NCL has been able to measure the utilization of Taiwan’s academic resources, such as theses and dissertations, journals, and other forms of literature, as well as better understand trends in research themes by analyzing citation and keyword statistics. Based on these conclusions, the NCL published the *2023 Capabilities of Taiwan’s Academic Resources Report*, which was officially released on April 26.

The release event was held at the NCL and was attended by more than 260 representatives of university libraries and academic publishers, parties of which eagerly awaited analyses into the academic resources available to support research in Taiwan.

本展覽以深入淺出的角度詮釋本館古籍，藉由活潑且具美感的設計，以及情境式的展場布置，喚起參觀者的興趣，令參觀者覺得古籍與自身的生活十分貼近。此外，融合共創的概念，在展場中提供體驗共同創作樂趣的空間，例如尋寶遊戲、標本製作及故事葉片留言樹等，鼓勵參觀者表達想法，促成雙向的知識建構場域。

此外，為強化古籍文獻展成效，本此展覽與荒野保護協會合作，特別推出「國圖植物園」物種蒐集競賽活動，邀請讀者在循著書香認識植物後，持續在生活中關懷植物生態。本次合作計畫包括 1 場教育訓練課程及 1 場為期 1 個半月的競賽活動，透過蒐集物種資料平臺 iNaturalist，一同蒐集本館周邊的動植物物種。統計至 10 月 23 日展覽結束，計有 2,038 次參觀人次。

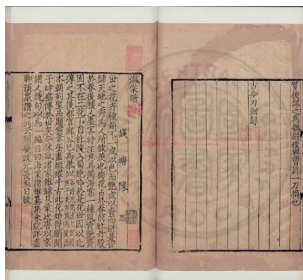

“Culture and Flora: The Plant-Inspired Lifestyle of the Ancient Past” Special Collections Exhibition

The “Culture and Flora” exhibition attempted to interpret several ancient texts held by the NCL in an accessible and engaging manner, namely adopting a vibrant and aesthetically pleasing design—coupled with immersive exhibition layouts—to make visitors feel that ancient texts are closely connected to our daily lives. Additionally, collaborative creation was a central concept. The exhibition space offered co-creation activities such as treasure hunts, making specimens, and a story tree comprised of leaf messages, all of which encouraged visitors to express their creativity and build a multidirectional knowledge environment.

To further promote the exhibition, the NCL in collaboration with the Society of Wilderness launched the “NCL Botanical Garden,” a friendly plant-collecting competition aimed at inviting visitors to care for plant ecology in our own daily lives after learning about flora from ancient

perspectives. This collaborative project included educational training courses and a one-and-a-half-month competition, in which participants used the platform iNaturalist to collect data on flora around the NCL. The exhibition concluded on October 23 with a total of 2,038 visitors.

辦理全國圖書書目資訊網合作編目研習

高品質書目紀錄的產生有賴於優質的編目員，優質編目員的培養有賴於完善的編目訓練。近幾年各類型合作館普遍面臨編目人員更替銜接的過渡期，同時也為因應國際編目規範的變革，本館每年辦理合作編目研習會，2024年度教育訓練業於6月12日舉行。課程安排以「AI與合作編目」為主題，包括：「利用人工智能產生國會圖書館主題詞」、「AI編目員的時代來了嗎」、「生成式AI在資訊組織的應

The “National Bibliographic Information Network (NBINet) Cooperative Cataloging Workshop”

Establishing high-quality bibliographic records relies on skilled catalogers, and naturally, the training of skilled cataloging staff depends on comprehensive training. In recent years, participating libraries in the “National Bibliographic Information Network” (NBINet) have generally faced transitional periods of cataloging staff turnover, and at the same time, international cataloging standards continue to evolve. The NCL thus holds an annual “NBINet Cooperative Cataloging Workshop,” with the 2024 rendition being on June 12. Workshop contents

本館特藏之孤本《貢草園集》，為越南明命皇第47子綿居之遺作該書卷首扉葉右上小字題印「嗣德甲寅」，為清咸豐4年、西元1854年出版，曾藏於晚清知名藏家潘祖蔭「滂喜齋」，具有高度的文史價值。本館與越南河內國家大學所屬社會人文科學大學於2023年簽署合作備忘錄，開啟本館首次與國外學術研究單位合作出版開端，並於2024年底出版。

Anthology of Gong Garden, the only surviving copy of which is held by the NCL, is the posthumous work of Nguyễn Phúc Miên Cư (1829–1854), forty-seventh son of Emperor Minh Mạng (r. 1820–1839) of the Nguyễn dynasty of Vietnam. The inscription in the top right corner indicates that it was published in 1854. Formerly housed in the Pangxi Studio collection of renowned late Qing dynasty collector Pan Zuyin (1830–1890), the work is of great historical and cultural value. In 2023, the NCL signed an agreement with the Hanoi University of Social Sciences and Humanities, marking our first collaboration with a foreign academic research institution on a publication, the work of which was published at the end of 2024.

建置學位論文相似檢測輔助系統服務

教育部於 2022 年委託本館及國立臺灣師範大學技術團隊，以「臺灣博碩士論文知識加值系統」之資料為基礎，開發「學位論文相似檢測輔助系統」，提供全國大專校院使用。本系統旨在提供全國各大專校院研究生論文相似檢測輔助工具，協助及促進研究生自主學習學位論文學術寫作技巧。為提供上線前之系統測試及營運服務測試，系統辦理二次試營運。2022 年 11 月 1 日至 2023 年 2 月 28 日進行第一次系統試營運，針對系統介面功能進行試營運，以瞭解使用者的反應，並演練如何與各校合作配合推廣此系統。第二次試營運自 2024 年 6 月 1 日起至 8 月 31 日止，由 21 所大學自由參加。總共有 5,527 名使用者啟用了帳號，這其中包括了 64 名各校管理員，以及 5,463 名碩博士生，有 2,834 名碩博士生至少進行了一次論文檢測，總檢測次數為 4,038 篇。

Establishing the “WriteAid Similarity Scanner” Detection System for Theses and Dissertations

In 2022, the NCL and National Taiwan Normal University were entrusted by the Ministry of Education (MOE) to develop the “WriteAid Similarity Scanner,” which is based on the “National Digital Library of Theses and Dissertations in Taiwan,” for use by all universities in Taiwan. This system is designed to compare theses and dissertations, technical reports, and practical reports, and to detect similarities, thereby assisting and promoting graduate students’ independent learning of academic writing skills. For the purposes of system testing prior to launch, it was in operation on a second wave of trial basis. The first, held from November 1, 2022, to February 28, 2023, collected user feedback to improve functionality, as well as practiced how best to cooperate with universities to promote the system. The second wave, June 1 to August 31, 2024, benefited from the voluntary participation of twenty-one universities. A total of 5,527 users activated accounts, including 64 administrators and 5,463 master’s and doctoral students. Of them, 2,834 students conducted at least one scan, with the total reaching 4,038 operations.

發布臺灣閱讀風貌及全民閱讀力年度報告

Report on the Reading Culture in Taiwan

《112 年臺灣閱讀風貌及全民閱讀力年度報告》於 3 月 27 日舉辦發布記者會，藉由統計分析 2 所國立公共圖書館及全國 22 縣市圖書館 2022 年的圖書館服務數據，呈現臺灣民眾在圖書借閱人次、圖書借閱冊數、到館人次、電子書借閱人次、累積辦證數、網站使用人次等閱讀力消長概況；並從 3,528 萬人次借閱圖書的讀者紀錄中，分析不同年齡層、不同性別的閱讀量與閱讀興趣；再從 1 億 2,723 萬筆的圖書借閱紀錄中，篩選、統計圖書的借閱次數，編製整理 2023 年圖書借閱年度排行榜。

在閱讀力表現績優城市部分，以各縣市與鄉鎮市之「人均擁書冊數」、「人均借閱冊數」、「人均到館次數」、「民眾持證比例」、「人均資源投入經費」、「人均館舍使用面積」及「人均網站使用次數」等數值，以作為檢視圖書館在培育民眾閱讀力的重要指標，藉由上述指標之分析，分別頒予「整體閱讀力表現績優城市」、「閱讀力分項表現績優城市——民眾擁書冊數表現、民眾每人借閱冊數表現、民眾每人到館次數表現、民眾持證比例表現」等獎項，共計 142 個單位獲得上述獎項。

Based on data gathered in 2023 from the two national and twenty-two county or municipal libraries on the general public's use of library resources and services in Taiwan, the NCL held a press conference on March 27 to release the 2023 *Report on the Reading Culture in Taiwan*, which analyzes the growth and/or decline of reading in terms of the number of book borrowers, books borrowed, library visits, e-book borrowers, library card applications, and website users. Moreover, the report surveys 35.28 million book circulation records from 2023, analyzing the reading volume and interests of different age groups and genders, and filters 127.23 million circulation records to compile an annual ranking of most borrowed books.

For cities that have exhibited a particularly robust reading culture—indicated by number of books possessed per capita, number of books borrowed per capita, number of library visits per capita, proportion of residents holding a library card, expenditures on resources per capita, area of usable space per capita, and number of website visits per capita, all of which demonstrate the library's role in cultivating reading culture—the “Top Overall Performing City in Reading Culture” and “Top Categorical Performing City in Reading Culture,” with categories including number of books owned by the public, average number of books borrowed per person, average number of library visits per person, and proportion of residents

holding a library card, were awarded to 142 recipients.

建置全國圖書館大數據服務平臺

為國內首個彙集各類型圖書館營運服務統計及公共圖書館去識別化閱讀興趣資料等數據資料的大數據服務平臺，透過整合性的平臺，將可全面性分析各縣市民眾閱讀風貌與閱讀興趣，並可提供政府、圖書館及出版社作為相關政策釐訂、圖書館閱讀推廣、館藏採購及出版方向策訂等參考。2024 年進行閱讀興趣資料之探勘與脈絡分析，透過 LDA 與 K-means 分群，打破圖書分類架構，分析民眾閱讀興趣。

The “National Public Library Big Data Service Platform”

As the first platform of its kind in Taiwan to collect statistics on the operation and services of libraries of any form and de-identified data on reading trends, the “National Library Big Data Service Platform” is capable of comprehensively analyzing the reading habits of the general public in each city and county, thereby providing government bodies, libraries, and publishers with references for policy-making, reading promotion, collection acquisition, and publication planning. In 2024, the NCL carried out a survey and collated analysis, and by employing LDA and K-means clustering, moved

beyond the more traditional library classification frameworks to analyze reading interests.

Expanding the Global Footprint of Taiwan Resource Centers for Chinese Studies (TRCCS)

Beginning in 2012, the NCL has been promoting the establishment of Taiwan Resource Centers for Chinese Studies (TRCCS) at major universities and research institutes

加強與各國漢學教學與研究單位之合作交流，推動海內外漢學學術交流，傳布臺灣漢學學術成果，共同建置全球漢學研究資源與訊息平臺，促進東西文化交流的廣度與深度。另，自 2023 年起，以「臺灣學術數位資源中心」（簡稱 TADRC）在國際學術界推動新的服務措施，提供本館、臺灣學術機構或商業開發之資料庫及電子書等數位資源，希望建立永續、實質且更具制度的營運方式，推展海外學術交流，帶動文化行銷，增加臺灣學術研究成果的能見度。

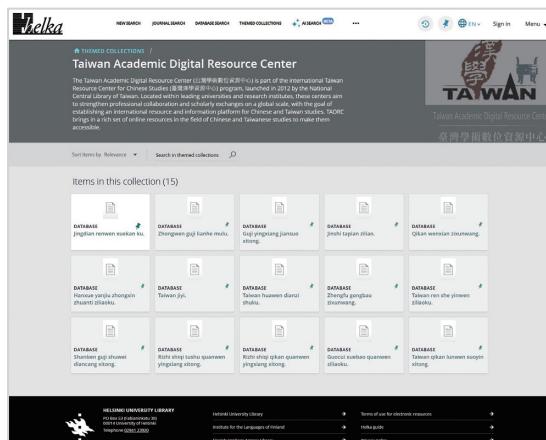

2024 年 TRCCS 新增美國匹茲堡大學、哈佛大學以及加拿大亞伯達大學 3 個據點，並與芬蘭赫爾辛基大學、捷克帕拉斯基大學簽署 TADRC 合作協議。總計於全球 29 國設置 50 個 TRCCS、3 個 TADRC。

around the world. Using the TRCCS—which has positioned itself as a jointly established platform for resources and information in related fields—as a base, we have been able to strengthen our collaboration and exchanges with teaching and research institutes concerning, as well as disseminate research achievements conducted in Taiwan around the world. Additionally, the Taiwan Academic Digital Resource Center (TADRC), which was inaugurated in 2023, aims to advance new service forms within the international academic community. More specifically, the TADRC provides digital resources such as databases and e-books developed and/or produced by the NCL, other academic institutions, or commercial enterprises in Taiwan through online channels in the hope of establishing a sustainable, substantial, and more systematic operation model; in turn, we can better promote overseas academic exchanges, drive cultural marketing, and increase the visibility of Taiwan's academic endeavors.

In 2024, the NCL added three TRCCSs at the University of Pittsburgh, Harvard University, and the University of Alberta. Cooperation agreements regarding the TADRC were also signed with the University of Helsinki and Palacký University Olomouc (Czech Republic). In total, there are now 50 TRCCSs and 3 TADRCs operating in 29 countries.

connections, as well as bolstering related collections here in Taiwan. Numerous significant publications and documents, such as annual reports, surveys, bilateral meeting reports, statistical data, minutes and proceedings, directories, guides, and even some monographs, cannot always be procured through conventional channels. Exchanges relying on the above connections are thus relied upon to secure specific literature, with participating parties including national libraries, major research universities, and academic research institutes. Among them, the NCL participated in book exchanges with 60 unique partners and in periodical exchanges with 460. In 2024, such exchanges added 11,050 items to our collections, while contributing 15,765 items to the collections of participating partners.

Additionally, we have collaborated with 53 institutes to establish resource centers abroad, namely Taiwan Resource Centers for Chinese Studies (TRCCS) and the Taiwan Academic Digital Resource Center (TADRC). Our signed cooperation agreements include regular publication donations on a yearly project basis, thereby disseminating significant literature from Taiwan around the world. In 2024, a total of 4,997 items (5,817 volumes) were donated through this channel, bringing the total from the period of 2013 to 2024 to 69,821 items (82,402 volumes); furthermore, e-books have been included in exchanges, with 103 and 204 being exchanged in 2023 and 2024, respectively.

To track these efforts and provide related information, the NCL has established the “Book Selection System of the International Exchange of Publications” system, the “International Book Exchange Inquiry System,” and the “TRCCS Website and Book Information Service System.”

建立服務提供的基礎模式，並突破現有服務框架，以發揮圖書館館員專業價值，同時帶動讀者服務品質之提升與館員專業能力之發展。

本館委託國立臺灣師範大學圖書資訊學研究所柯皓仁教授研訂《公共圖書館可及性指引》，於 2023 年出版，因社團法人中華民國身心障礙聯盟就內容給予相關改善建議，2024 年邀請多個專業聯盟與學會協助提供修正建議，完成二版修訂，提供全國公共圖書館參考，以促進館員對公共圖書館服務可及性議題之認知，在圖書館服務、空間與設施設備等之提供上，皆能更全面考量不同群體的特性與需求，以達所有人皆能平等取用公共圖書館服務的目標。

A Knowledge Map for Librarians and Related Staff: The Formulation of Professional Guidelines

To promote the development of the national library industry and guide the professional growth of library and information science partners, the NCL implements an annual program designed to establish related professional service guidelines. The aim is to assist libraries in establishing a foundational service model, breaking through existing service frameworks to maximize the professional value of library staff, as well as enhancing reader services and fostering the professional development of library staff.

To this end, the NCL commissioned Professor Hao-Ren Ke of the Graduate Institute of Library and Information Studies at National Taiwan Normal University to draft the *Accessibility Guidelines for Public Libraries*, which was published in 2023. Following suggestions on how to further improve offered by the League for Persons with Disabilities, in 2024, multiple professional associations and societies were invited to assist in the revision process. The second revised edition was completed and made available to public libraries throughout Taiwan to better the understanding of librarians and related staff regarding accessibility issues in public library services. This has ensured that services, spaces, and facilities are designed to comprehensively consider the characteristics and needs of diverse groups, thereby achieving the goal of equal access to public library services.

The program included seven courses taught by experts in related disciplines: collections development and acquisition practices, information organization, interpersonal communication, design thinking and innovative services, curation and exhibition practices, information technology applications, quality management, and customer services. Participants could receive informal accreditation from the Non-Formal Education Programs Accreditation Center at National Taiwan Normal University.

Two sessions, open to librarians and related staff, were organized in Taichung and Taoyuan cities, respectively. Learning achievement assessments and accreditation based on test results were incorporated into the program, aiming to assist participants in better grasping course materials and enhancing their professional capabilities.

The “Public Library Operational Management and Innovative Development Course Series”

In an effort to further the operational efficiency of public libraries throughout Taiwan and solidify the professional capacities of related staff, the NCL organized the 2024 “Public Library Operational Management and Innovative Development Course Series,” namely a workshop and round of lectures, with the aim of fostering professional development and exchanges regarding library and information science through practical exercises. Specific areas of focus included developing a professional literacy in age and group-based services as well as in systems that lead to brand recognition, both of which stimulated innovative thinking. In 2024, three sessions were held centered on the theme “An Innovative Reading

Enhancing Professional Identity and Enthusiasm for Service

In 2024, the NCL organized four “Librarian Professional Competencies Training” sessions designed to foster innovative thinking and broaden one’s horizons, while integrating modern technological applications. Core themes centered on practical business operations, aesthetic literacy, and AI application. Former Director Janice Hung of the Tainan Public Library and Liu Ying-lin, head of services at the National Taiwan University Library Special Collections, were invited to respectively present on “Preparatory Processes in Establishing a New Library” and “Establishing and Operating the Automated Storage and Retrieval System (ASRS) of the Southern Branch of the NCL,” both of which aimed to provide librarians and related staff with a clearer and more comprehensive understanding of the future planning for the construction of the Southern Branch. Furthermore, we invited Vice President Shyhnan Liou of the Research and Development Division at the Taiwan Design Research Institute and Professor Hsiao Hui-chun of the Department of Visual Arts at University of Taipei to instruct at the “Aesthetic Literacy Workshop: Design Thinking and Aesthetic Design for Libraries” and the “Applied Aesthetics Workshop: Design Techniques for Creating Attention-Grabbing and Professional Presentations,” both of which instructed on how to create library services tailored to specific values and target audiences, as well as using AI in creating presentations.

to broaden international perspectives and keep pace with global trends, the NCL specially invited Chief Librarian Larry Alford of the University of Toronto to lecture on “Print Preservation in the Digital Age: Why, How, the Future.” Using the example of the Keep@Downsview system established by the University of Toronto Libraries at Downsview in collaboration with five Canadian universities, Chief Librarian Alford shared their experiences in both system establishment and operations, including design requirements, methods in operations (such as acid-free archival boxes, placement of large print books, inventory processing, and acquisition selection), as well as how to cooperate with professional warehouse management personnel. In addition to the lecture, a discussion session was organized, which included the use of chatbots to answer reader questions and the application of AI technology digitized image and file retrieval.

In 2024, the seminar was titled “Librarians: Acquisitions of Taiwan Publications and Digital Research Resources,” with the goal of assisting librarians and related staff in better grasping procurement channels, introducing academic achievements and efforts in Taiwan, as well as creating a foundation for research support.

From February 19–22, seminar contents featured lectures by experts and scholars from the publishing sector in Taiwan on acquisitions—and related issues—of Chinese-language publications, audio-visual materials, and digitized archival materials. Furthermore, on the second day of the seminar, participants were taken on a guided tour of the 2024 Taipei International Book Exhibition on its opening day, allowing them to visit Taiwanese publishers and collect materials of interest. The activity in this way provided an understanding of the latest publishing trends in Taiwan, laying a solid foundation for future academic research work and exchanges.

強化 ISBN 系統功能，成為政府部門對出版服務的橋樑

「全國新書資訊網」為國內新書出版服務的重要平臺，2024 年出版社透過此平臺申請國際標準書號（ISBN）編配計 6 萬 2,328 筆（冊）。2024 年獲得教育部經費挹注，進行平臺功能優化，將紙本書、電子書及有聲書之 ISBN 申辦，整合於單一窗口服務，ISBN 申請、審核、給號提供一站式服務，並與送存系統業務相互銜接連貫，出版者可透過單一帳號登入，完成 ISBN 申請、法定送存及多元授權等作業，縮短申辦流程，提升出版與送存的便利性，為臺灣出版產業創造更完善、更有溫度的生態環境。

publishers regarding repository operations. Additionally, the committee also expanded the range of file formats that the system can accommodate in accordance with the latest e-book and audiobook standards as defined by the World Wide Web Consortium (W3C). The development and implementation of our “Publication Repository System” was completed in December, with plans to launch the system on a trial basis for the publishing industry in the first quarter of 2025. The new system is designed with modularity, separating repository procedures from digital rights management as well as offering services for various forms of publications, such as printed works, .pdf versions, e-books, and audiobooks, all through a single platform.

Improving “ISBNnet” Functionality to Bridge Government Entities and Publishing Services

“ISBNnet” is an important platform for new book publishing services relied upon throughout Taiwan. In 2024, publishers applied for 62,328 International Standard Book Numbers (ISBN) through the platform. The NCL received funding from the Ministry of Education (MOE) to optimize functionality, integrating the application process for ISBNs for print books, e-books, and audiobooks into one service. ISBN applications, approval process, and issuances are likewise now handled as a one-stop service. Finally, the platform is also seamlessly integrated with the repository system, allowing publishers to log in with a single account to complete ISBN applications, mandatory deposits, and other authorization procedures. All in all, these efforts have streamlined the above processes, improved publishing and deposit procedures, as well as created a more comprehensive and supportive ecosystem for the publishing industry in Taiwan.

Establishing Creative Spaces to Further the Abilities of Our Youth

In response to the rapid development of information media and the diversity of its channels, as well as aiming to meet the needs of the public, whether in regards to research, creation, or even leisure, the Ministry of Education approved the “Establishment of the NCL Open Lab Multimedia Center and the Migration of Collections Project” on May 21, 2021. With the project in place, the NCL began replanning service spaces and models as well as how one may access our collections, with the ultimate goal of providing the public with further diversified and professional services through—in part—a new multimedia center. On November 19, 2022, the Open Lab Multimedia Center was officially opened.

The Center is located in Ximending, which leans towards a younger crowd, and more specifically, near the Red House, where many young Taiwanese creators can be found. By emphasizing open space, exploratory learning, cross-sector integration, and exchange, the Center combines elements of a traditional library with concepts tied to science and technology, exploration, and interactivity to create an Open Lab that differs from an ordinary library, a place for creativity and ideas as well as exploring and exchanging knowledge. 本館持續推動 2017 年 12 月 28 日行政院核定之「國家圖書館南部分館暨聯合典藏中心建設計畫」，於 2022 年完成簽約及動工典禮，持續透過建立管考督工機制，積極推進工程進度，截至 2024 年，新建工程進度累計逾 43%；建築物結構體於 4 月趨近完成，為祈求工程順利，於 4 月 18 日於新建工程基地內舉行上梁典禮，行政院長陳建仁親臨主持，包括教育部長潘文忠、本館館長王涵青、臺南市長黃偉哲、圖資界代表、臺南市在地立委及 20 多位市議員、施工團隊等多位貴賓也一同出席，共同見證新建工程達成階段性里程碑。

各項重要設施設備建置案亦持續進行，其中「國家聯合典藏中心高層高效倉儲書架設備採購案」，已完成核定細部設計及耐震測試合格，並於 11 月 7 日進場安裝。「南部分館傢俱設備案」於 10 月 22 日完成核定細部設計。「公共藝術設置計畫案」於 12 月 31 日完成議價決標簽約。「國家聯合典藏中心書庫管理系統」於 12 月驗收完畢，目前已上傳 163 萬筆書目資料。「圖書博物館展示設計製作統包案」於 7 月 23 日完成決標作業。

The NCL continues to advance the “Southern Branch of the National Central Library and National Repository Library New Construction Project,” which was approved by the Executive Yuan on December 28, 2017, with the contract signing and groundbreaking ceremony taking place in 2022. Through established oversight mechanisms, construction has been actively pushed forward, reaching 43% completion as of the end of 2024. As the structural framework of the building was nearing completion in April, to wish for continued smooth progress, a beam-raising ceremony was held on April 18, which was presided over by Premier Chen Chien-jen and attended by Minister Pan Wen-chung of Education, NCL Director-General Han-Ching Wang, Mayor Huang Wei-che of Tainan, representatives of the library and information science community, local legislators, city councilors, and members of the construction company, all of whom bore witness to the milestone.

The construction and installation of several important facilities and pieces of equipment have also progressed. The “National Repository Library High-Performance High Shelving Purchase Acquisition,” for example, had its detailed designs approved and passed seismic testing, with installation on November 7; the detailed designs for the “Southern Branch of the NCL Furnishings Purchase Acquisition” were finalized on October 22; the bidding and contract signing of the “Public Art Installation Project” were completed on December 31; final inspections of the “National Repository Library Automated Storage/Retrieval and Return/Sorting System” were completed in December, in which 1.63 million bibliographic records have already
